

# SUN WILL BE BLOTTED OUT

Partial Eclipse Is Due to Be in  
Evidence at 7 O'Clock  
Sunday Morning.

Those who feel like being the early bird Sunday morning may catch the eclipse of the sun, for tomorrow the sun is going to be partially out of business for nearly two hours. The moon is going to do the business.

The eclipse tomorrow will be an annular eclipse. An annular eclipse differs from a total eclipse in that it is only partial. Profound research reveals the fact that, strictly speaking, an annular eclipse is an eclipse of the sun in which a portion of its surface is visible in the form of a ring surrounding the dark body of the moon. This occurs when the moon is too remote from the earth to cover the sun completely, and at the moment when the centers of both sun and moon are nearly in line with the point on the earth's surface where the observer stands.

In various parts of the globe the eclipse will assume different shapes. The length of the obscuration will vary, as will also the position of the angle. On this meridian time the eclipse will begin at 7 a. m. and end at 8:56 a. m.

No doubt many will be out to observe the eclipse. The old method of looking through smoked glasses will be used again as it has been ever since glasses were invented. A tub of water as a mirror is also an excellent means of observation. It were well if people do not look the eclipse squarely in the face, for if they do something may happen to their eyes.

# SUIT BROUGHT BY GOVERNMENT

Effort to Compel Central Pacific  
to Forfeit Patent to  
Nevada Lands.

Reno, Nev., June 26.—A special from Carson says:

In the United States court today United States District Attorney Sam Platt instituted two suits in the federal court against the Central Pacific Railroad company, the Southern Pacific Railroad and the United States Trust company of New York.

The suits are brought to compel the Central Pacific company to forfeit its patent to land in Nevada, on the ground that the patents were obtained by false affidavits, by sworn statements to the effect that the land on which patents were granted were non-mineral in character.

The land in question is located in Washoe and Humboldt counties. That in Washoe county is the site of the famous Rocky Hill and Harris mines, near Washoe City.

The companies have been cited to appear before the federal authorities at Carson City, on Aug. 25, and show cause why the patents should not be revoked.

Attorney Platt will be assisted in the prosecution of the case by Attorney General Bonaparte and his associates, Bush and Hall. The latter two gentlemen will be here in person when the cases are called.

# NO DETAILS OF THE TRAGEDY

Searching Party Looking for Bodies  
of Men Murdered in the  
Philippines.

Manila, June 26.—No further word has been received from H. B. Everett of the Philippine forest service, and T. H. Wakely, a school teacher, reported to have been killed by hill tribesmen on the island of Negros.

Wakely and Everett, with their servants and two native foresters, started from the town of Cabanacan, on the mountainous island of Negros, in the early part of May, intending to examine the coal deposits in the hills about Mount Pipai. To do this they left the beaten trail across the island, and since their departure from Cabanacan nothing has been heard of them.

Officials at the town of Balis, on the same island, now report that the party was assailed in the hills by the wild tribesmen and murdered; and, moreover, they claim to know the identity of the murderers. Beyond this statement they give no details of the tragedy.

Forester Ahern of Manila has started for the scene of the murder, where he will join forces with the constabulary in going over the trail and adjoining country, in the hope of finding the bodies of the murdered men and tracing down and arresting the murderers. The constabulary force on the island has already established camps along the trail to facilitate the search.

## Cured Hemorrhages of the Lungs.

"Several years since my lungs were so badly affected that I had many hemorrhages," writes A. M. Ake of Wood, Ind. "I took treatment with several physicians without any benefit. I then started to take Foley's Honey and Tar and my lungs are now as sound as a bell. I recommend it in advanced stages of lung trouble." Foley's Honey and Tar stops the cough and heals the lungs, and prevents serious results from a cold. Refuse substitutes. F. J. Hill Drug Co., "The Never Substitutors."

# TRYING TO LAND WOOD

Quartet in Council Needs One More  
Vote to Take Contract From  
Lowest Bidders.

A. J. Davis, president of the council and acting mayor, yesterday approved of the contract of J. D. Hanley for laying 21,000 feet of water mains, but has so far neglected to approve of the Davis & Heuser contract for sewer extension No. 138. It is this contract which has caused so much trouble in the council and Davis will undoubtedly veto it if he is assured that his vote will be sustained.

In this connection a peculiar condition has arisen. When the contract was approved there were ten votes for it and four against, and Councilman O'Donnell was then and is still out of town. In order to pass the contract over the mayor's veto ten votes are necessary and the friends of Davis & Heuser have that many at present.

The four who opposed awarding the contract to the lowest bidders were Martin, Black, Fernstrom and Davis. This combination is now trying to get Wood to vote with them in sustaining Davis. Wood is a follower of Black. He did not follow his leader a week ago, but is expected to be good from now on.

Increase		697,432	

The state board of equalization yesterday transmitted to Frank Hegibush, county auditor, the above statement of the assessments made against public service corporations operating in Salt Lake county.

The table shows that the aggregate increase has been \$697,432 over the 1907 assessment.

The largest increase is in the assessment of the Utah Light & Railway company, which was boosted \$428,894. This is explained to be due to the many improvements which the company has made the past year, making its property much more valuable than it was when the assessment was made last year. Of the assessment of the company the larger portion of it will be within the city limits and therefore is available for taxes for city purposes.

The Bell Telephone company was also raised considerably. The Independent Telephone company had its assessment cut slightly, as did the Salt Lake Route and the Western Pacific Railway company.

The Salt Lake & Ogden, known as the Bamberger road, was raised \$10,000.

The assessments shown in the first two columns are all within the 1907 and 1908 figures. The figures in the last column show the assessment for the various companies in the entire state, which is divided between the various counties in which the companies operate in proportion to the business done and property owned.

It is now the duty of the county auditor to apportion these assessments between the various taxing districts in the county, which will probably occupy two weeks' time.
